

SCIENCE BRINGS NATIONS TOGETHER

Postdoctoral Programme in Radiochemistry

12-month contract, renewable for another max. 24 months

Your mission

The work will be directly connected with a number of studies in the field of neutrino physics and astrophysics carried out in the Laboratory of Nuclear Problems (search for neutrinoless double beta decay, dark matter, neutrino with CENNS, etc.). The main objective of this position is determination of impurities (trace amounts) in samples, detectors, structural materials and shielding by inductively coupled plasma mass spectrometer (ICP-MS).

Your tasks

You will work with our Radiochemistry group at Dzhelepov Laboratory of Nuclear Problems. Your research programme will be focused on:

- determination of ultra-low impurity concentrations in low-background samples;
- determination of elemental and isotopic composition of samples.

Constraints and risks

The candidate is expected to go on international business trips for periods of 1 to 4 weeks. Work in shifts and work on the weekends may be necessary, remote work is allowed.

Depending on your citizenship, you may need to obtain a visa and this process can last several months. JINR offers all the necessary support for obtaining the entry permit for the Russian Federation.

Your profile

- Highly motivated candidate with a PhD (obtained less than 5 years ago) in analytical chemistry or similar field.
- Age under 40, have not had more than 3 temporary positions.
- Strong background in analytical chemistry is a prerequisite.
- Practical experience in inductively coupled plasma methods would be advantageous.

As an international intergovernmental research organization, we are particularly keen to
ensure that we also attract applicants from outside of Russia. You must have good
knowledge of English and be willing to learn Russian (a language course will be provided
by JINR).

What we offer

High quality of life

Called the "Island of Stability", the city of Dubna is ideally located on the bank of Europe's largest waterway — the Volga River (only 2.5 hours from Moscow by train or bus and 1.5 hours by car from Sheremetyevo International Airport). It is important for us that our employees quickly and easily adapt to the new living conditions and have a healthy work-life balance. Therefore, we offer accommodation in comfortable guest-house rooms (for singles), or fully furnished flats owned by JINR, and annual paid leave.

Prospects

We guarantee you a **12-months postdoctoral contract, renewable for another max. 24 months (36 month in total)**, in a multicultural scientific environment.

Remuneration

2300 USD per month, paid in Russian rubles at the planned exchange rate (forecasted year-average), which is adopted with the JINR budget for the current year. In 2023, the exchange rate is 69.2 Russian rubles per 1 USD.

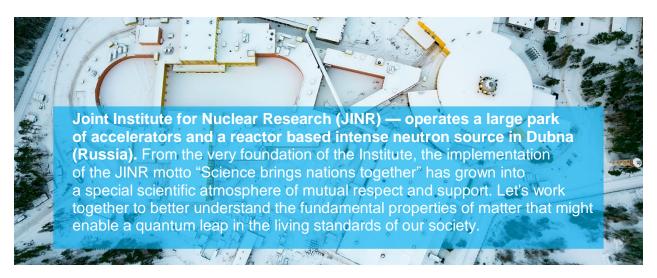

Income tax of 13% is applied. The employer shall pay no pension insurance.

Benefits

We offer generous social benefits (settling-in allowance, free health insurance for you and your family members), relocation assistance (under certain conditions), free school or kindergarten attendance for children. We also offer free language courses and subsidies for the use of JINR sports infrastructure (Olympic swimming pool, stadium, gym, etc.), as well as access to a variety of cultural activities.
