Dear colleagues and friends,

The 2nd stage of the JINR International Practice for young specialists from South Africa has recently started. In the latest issue of the JINR Newsletter, you can learn about their first impressions of Dubna and the Institute. The conference of the JINR Youth Association is in full swing now. The Baikal-GVD collaboration gathered to discuss the expedition that ended in April as well as

future plans of the experiment. Read also about the results of the JINR delegation visit to Mexico and the development of cooperation between JINR and the Chinese Institute of Plasma Physics (Hefei). **JINR Press Office**

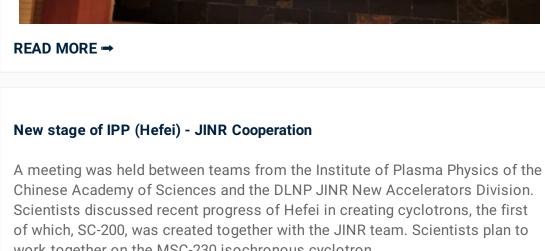

As a result of the JINR delegation's visit to Mexico, the parties agreed that they would try to formulate several joint projects and start preparations for their implementation. So that next year, these projects will officially start with the

Baikal-GVD collaboration discussed results of winter expedition and future plans

From 30 May to 2 June, a meeting of the Baikal-GVD collaboration was held at

DLNP JINR. Participants discussed the results of the last winter expedition during which new clusters of the Baikal Neutrino Telescope were installed. In particular, they discussed the results in increasing the reliability of the telescope and promising results of a new method of time synchronisation of optical modules. READ MORE → New light: scientists have studied the structure of photoproteins Photoproteins, proteins that can glow in the dark, have been studied with JINR participation. They are used in cell research, immunoassay, and detector development. Scientists replaced the nucleotides in the photoprotein gene

using genetic engineering. The research is aimed at creating "luminous"

proteins with the required properties for experiments.

Regular Conference of Young Scientists and Specialists started in Alushta The annual International Conference of Young Scientists and Specialists began at the JINR Hotel "Dubna". This year, the event brought together participants from five countries. At the conference, participants will make reports on key JINR projects, the latest achievements, goals and objectives of laboratories within the Seven-Year-Plan for the Development of JINR for 2024 - 2030.

Digest of main AYSS events AYSS has published a digest of the main events and results of its activities for April-May 2023. Young scientists and specialists spoke about the seminars and the work of the clubs. In 2 months, they elected a new Chairman of the Council, held 2 meetings, participated in a scientific societies meeting, and much more. READ MORE →

This Friday, on 9 June, at 6:00 PM, you can watch a biographical film "I, Tonya" (2017). All are kindly invited! Please note that the JINR Cinema Club returns to

Announcements

The School will take place from 19 to 23 June at the "Lipnya" JINR Tourist Base. Project participants will learn about the goals, tasks, structure, opportunities, history, and the main systems of the NICA Complex. The programme also includes lectures on linear accelerators, synchrotrons, colliders and their operation. Applications are welcome until 11 June.

Registration for AYSS Accelerator Physics School opened

Baikal Summer School invites participants

Registration for the XXIII Baikal Summer School on Physics of Elementary Particles and Astrophysics opened. The School will take place from 11 to 18 July in the village of Bolshie Koty on the shore of Baikal. Participants will attend lectures on neutrino physics, cosmology, astrophysics, accelerator and reactor neutrinos, statistical methods of data analysis, and much more. Applications are welcome until 16 June. XXIII Baikal International Summer School on Physics of Elementary Particles and Astrophysics July 11-18 2023, Bolshie Koty

Announcement by CPED JINR about switch to direct agreements

Interview with JINR Scientific Leader Victor Matveev

CPED JINR has published a list of 22 houses, whose owners and tenants will switch to direct agreements starting from 1 July. It means that payments for heating, hot and cold water supply, and sanitation will be included in a unified payment document by "Information and Settlement Centre "Dubna" LLC.

Media

The third part of an interview "Family. Start of work at INR" with JINR Scientific Leader Victor Matveev has been issued. He spoke about the first meeting with his future wife, the establishment of the Young Theorists' School, working at

Filming at VBLHEP On 6 June, a coverage for the "Obrnadzoro" project was filmed at VBLHEP. The coverage will be about the opportunities that students from the University "Dubna" can gain from working at JINR. A Dubna university graduate and VBLHEP senior engineer Ilya Shirikov spoke about his work on the NICA Megascience Project, for which he develops electronics.

Recently, the first stage of the Student Practice of the University Centre has finished at JINR, and the second stage has begun as well. Students from Egypt
