

SCIENCE BRINGS NATIONS TOGETHER

JOINT INSTITUTE FOR NUCLEAR RESEARCH

## JINR Newsletter #26, 22 September 2022

*Dear colleagues and friends,*

*The Institute's life is rich in memorable dates. Thus, on 17 September, JINR celebrated the birthday of Mikhail Meshcheryakov, one of the Institute's founders. The national holiday of Armenia, a JINR Member State, was celebrated on 21 September. And we have a significant anniversary ahead of us. 24 September will mark the 25th anniversary of the signing of the landmark agreement between JINR and UNESCO.*

*These days in Alushta, participants of the international workshop are discussing problems of colliders and accelerators of charged particles. FLNP staff members as part of a research team found out how the shells of fossil molluscs had changed by studying their crystallographic texture.*

*Students from Egypt met pupils of the Kadyshevsky Lyceum, the JINR football team won the Dubna Championship, the Veksler run and new Blokhinka events are ahead, so to say, life is in full swing! Read about it in this issue of the JINR Newsletter.*

## Meetings

### **Problems of colliders and accelerators being discussed in Alushta**

On 21 September, the traditional 14th International Scientific Workshop in memory of Professor V. P. Sarantsev "Problems of colliders and charged particle accelerators" started in the Resort Hotel "Dubna", Alushta. In addition to the issues of accelerator science and technology, participants are considering the current status of the NICA Megascience Complex and the SKIF Synchrotron.

## Research

### JINR scientists studied fossil mollusc shells change

Scientists of FLNP JINR have identified features of the texture of minerals in fossil shells of molluscs. The findings would enable scientists to understand better how extinct molluscs were organized and lived about 165 million years ago.

## Education

### International dialogue between Dubna and Egypt students

A meeting was held between Egyptian students, participants of the JINR Science School, and pupils of the Dubna Physics and Mathematics Lyceum named after Academician V. G. Kadyshesky in a warm atmosphere and with great mutual interest.

## Publications

### Precision high voltage sources for nuclear radiation detectors

Precision high voltage sources for nuclear radiation detectors on transformers have been developed in FLNR JINR. These are important elements of measuring facilities in experimental nuclear physics.

## Recalling founders

### Mikhail Meshcheryakov

On 17 September, the Joint Institute for Nuclear Research recalls Mikhail Grigorievich Meshcheryakov (1910 – 1994), an outstanding experimental physicist and a talented science organizer, a laureate of USSR state prizes, Corresponding Member of the USSR Academy of Sciences, the founder and the first Director of the research centre in Dubna.
