

JINR Newsletter #28, 23 July 2026

Dear colleagues and friends,

Last week saw several high-level events with JINR participation in France. As a world-leading centre in various areas of science, the Institute held a special session at the first IDSSD Global Conference at the UNESCO headquarters. In addition, as part of a delegation led by Russian Minister of Science and Higher Education Valery Falkov, Grigory Trubnikov visited the ITER reactor at Cadarache.

Lake Baikal has recently hosted the annual summer school on the physics of elementary particles and astrophysics with 99 participants from six countries. The event provided students and young scientists with the opportunity to learn more about research at the forefront of science and jumpstart a scientific career at JINR.

In the latest JINR Newsletter, you will find details about the recent ISINN conference, the retro festival in Dubna, JINR's sports achievements, and much more.
